

Table 4 Canonical discriminant functions evaluated at group means (Group Centroids) that used to differentiate field collected females *An. arabiensis*. Group with different sign or a high group centroid value is discriminated from the others.

Place of collection	Function		
	1	2	3
Kassala	1.305	-.183	.140
New Halfa	-1.008	.222	-1.619
Aroma	-1.175	1.948	1.036
Wagar	-2.207	-1.595	.867
